SUMMARY

Software developer at GE Appliances with progressive experience across systems analysis, cloud development, business analysis, and AI agent engineering. Currently pursuing an MS in Business Analytics with an AI Concentration at the University of Louisville (GPA 3.9), with deep expertise in building and deploying production-ready AI agents on Google Cloud. Skilled at translating complex business requirements into scalable, data-driven solutions that reduce manual overhead and accelerate development cycles.

EDUCATION

University of Louisville

Master of Science, Business Analytics w/ AI Concentration | GPA: 3.9/4.0
Focus: Advanced Analytics, Machine Learning, and AI Agent Development

Aug 2025 – Sep 2026

Aurora University – Aurora, IL

BS Computer Science | *BA Business Administration* | GPA: 3.63/4.0 | *Cum Laude, Dean's List 2022–2023*

May 2024

EXPERIENCE

AI Solutions Architect | GE Appliances – Louisville, KY

Jan 2026 – Present

- Refined and productionized AI agents to streamline Jira ticket workflows, improving software development efficiency and reducing manual overhead for the engineering team
- Developed a code generation agent that automatically produces code from ticket requirements and acceptance criteria, significantly reducing development cycle time
- Deployed AI agents on Google Cloud using Terraform, optimizing infrastructure costs and ensuring scalable, production-ready delivery

Associate Business Systems Analyst | GE Appliances – Louisville, KY

Jul 2025 – Jan 2026

- Managed and delivered projects utilizing Waterfall and Agile methodologies, ensuring on-time execution across cross-functional teams
- Conducted audits of legal data assets to ensure retention compliance and business relevance
- Proposed and presented improvements to legacy business processes, increasing operational efficiency

Associate Cloud Developer | GE Appliances – Louisville, KY

Jan 2025 – Jul 2025

- Diagnosed and resolved Java code issues within critical business systems, reducing production defects
- Migrated repositories from GitHub Enterprise to GitHub.com, ensuring a seamless transition with minimal disruption to development workflows
- Participated in daily Agile Scrum stand-ups and managed tasks in Jira for efficient workflow coordination

Associate Systems Analyst | GE Appliances – Louisville, KY

Jul 2024 – Jan 2025

- Created, designed, and published Tableau workbooks for business insights and performance tracking
- Developed and implemented Power Automate cloud flows to streamline business processes
- Authored SOPs and user guides; established and tested Tableau Server connectivity between front-end and back-end

CERTIFICATIONS

Google Generative AI Leader Certification | Google

AWS Certified Cloud Practitioner | Amazon Web Services (AWS)

Issued Feb 2026 · Expires Feb 2029

Issued Jul 2025 · Expires Jul 2028

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, JavaScript, C++, C#

Cloud & Infrastructure: GCP (Vertex AI, Cloud Run), AWS, Azure, Terraform

AI & Data: AI Agent Development, LLM Integration, Machine Learning, Tableau, Power BI

Tools & Platforms: Power Automate, Jira, GitHub, JetBrains IDEs, Postman, MySQL

Methodologies: Agile/Scrum, Waterfall, Business Analysis, Data Analytics
